WILD and the surrounding jungles have mountain biking opportunities for riders of all skill levels. About an hour drive from the Camp is the Kirirom Reservoir that offers a challenging uphill ride and an exhilarating downhill sprint. (1-4 hours)

## KAYAKING

The Southern Cardamom rainforest has some of the highest annual rainfall in south east asia. All that water drains off to the Gulf of Thailand through a massive system of rivers and estuaries creating many opportunities for flat water kayaking. We have explored this region for several years now and have only scratched the surface of the different kayaking routes available. Your best opportunities for bird watching are along these barely used routes where the rare encounter with a fisherman will surely be a surprise and delight. Your options are only limited by water levels and your curiosity. (2.5 hours)
